Protect People. Protect The Environment

OVERVIEW

FLINT MICHIGAN DRINKING WATER (FROM CRISIS TO RECOVERY WEBINAR)

EPHI's mission is to help clients protect people and the environment. It is unfortunate that communities still suffer from preventable public health crisis; therefore, it is essential that if these crisis do occur, that steps be taken to end them as quickly as possible.

Objective: This webinar will provide an in-depth overview of actions taken by the regulatory community to end the emergency response aspect of the Flint Drinking Water Crisis; shifting efforts to the recovery phase. The target audience for this webinar are those that are involved in public health/environmental regulatory oversight, implementation, and decision-making. This Includes senior environmental executives, all levels of management, and technical staff.

Webinar Time/Capacity: Approximately two hours and forty-five minutes (including a ten minute break). Webinars are limited to 12 attendees.

Webinar Availability: There are a limited number of webinar slots remaining. Please send an email to Anthony.Ross@EPHILLC.com to confirm if webinar slots are still available.
